PREFACE

The 1982 Crime in Alabama report is intended to inform law enforcement officials and private citizens of criminal and law enforcement activity in Alabama. Since the UCR offense and arrest data are the basis of this report, it must be noted that other factors affecting crime are not measured by UCR, i.e., age, sex, and race of the population, economic conditions of the area, transient population, culture, education, climate, attitudes of the victims toward crime and police, and crime reporting practices of the citizens. Therefore, it is difficult to draw conclusions or make valid comparisons between various jurisdictions by using only the crime and arrest data in this book. The data in this book are used for analyzing crime problems inherent in the criminal justice system and as a foundation for planning and budgeting.

Geographic areas covered in this report include the State of Alabama, Standard Metropolitan Statistical Areas (SMSA's), county and city strata. A 1982 Crime by County report is contained in Appendix A.

We would like to extend our appreciation to law enforcement agencies--sheriff's departments, municipal police departments, and campus police--for their cooperation in the UCR program.

INTRODUCTION

In October of 1975, Act 872 passed both houses of the Alabama Legislature creating and establishing the Alabama Criminal Justice Information Center (ACJIC) which is commissioned to collect, store, retrieve, analyze, and disseminate criminal justice data. Inherent in ACJIC is a "uniform crime reporting system for the periodic collection and analysis of crimes reported to any and all criminal justice agencies within the state." (Act 872, Section 9, 1975)

With the passage of this bill, mandatory reporting was required of law enforcement agencies in Alabama. Prior to 1976, law enforcement agencies participated in the FBI's Uniform Crime Reporting Program (UCR) on a voluntary basis. Since mandatory submission, there has been a 185% increase in UCR reporting.

Alabama's UCR program functions in accordance with FBI standards of operation, i.e., a uniform data collection device and quality control procedures which provide viable crime statistics and an accurate indication of crime and crime trends.

ACJIC has implemented an incident-based reporting system as an alternative to UCR. The Incident-Based Reporting System (IBR) provides a self-contained internal recordkeeping system for the agency as well as data for ACJIC to generate UCR.

IBR is a voluntary system with 70% of Alabama's agencies participating. Law enforcement agencies have the option of utilizing IBR rather than UCR summary since comparable data elements can be obtained from IBR forms. All the information received by the investigating officer is recorded on the IBR forms and a copy is sent to ACJIC. This information is more detailed in nature than requisites for UCR. This wealth of information provides great potential for better services, analyses, and resource studies by both the individual agency's crime analysis units and ACJIC.

Alabama's law enforcement agencies are supplied with monthly reporting forms, either UCR summaries or IBR forms. ACJIC's Technical Assistance field staff is made available to the reporting agencies to help answer any questions which may arise regarding forms, crime classifications, and clearance data. The Technical Assistants are also responsible for training law enforcement personnel and maintaining the quality of information for output to the criminal justice system.

When the UCR summaries or incident reports are returned to ACJIC, they are reviewed for accuracy by the quality control section of UCR. Then, the Alabama UCR program furnishes the contributing agencies and the FBI with monthly data for their verification and review process.

CRIME AND ARREST DATA

Valid crime data can provide a solid foundation for statistical analyses, management-oriented analyses and crime breakdowns. These analyses can then aid local police departments in laying out patrol districts, assigning patrol units, and designating community education programs.

Data used in this report are provided by the Uniform Crime Reporting section (UCR) of the Alabama Criminal Justice Information Center (ACJIC). ACJIC′s UCR section is the depository for reported offenses and has the responsibility of collecting and disseminating crime data.

In 1982, approximately 300 agencies reported known offenses to Alabama′s UCR; 70% of Alabama′s law enforcement agencies submitted Incident Reports and 30% returned UCR Summaries.

Through a mandate of Congress, Arson is counted as a Part I Offense. So as not to distort crime trends in Total and Property Crime indices, Arson totals will not be included in these sections but will be included in a separate section following property crimes.

Crime data are obtained from the Part I Index of Offenses submitted by law enforcement agencies to Alabama′s UCR program. These Part I Offenses are divided into Violent Crime and Property Crimes.

Violent Crimes include Homicide, Rape, Robbery, and Assault. These crimes are considered violent inasmuch as they are offenses perpetrated against a person(s) with a high risk or injury or death to the victim(s).

Property Crimes are comprised of Burglary, Larceny, Motor Vehicle Theft, and Arson*. Property or Non-Violent Crimes lack the aspect of force and/or bodily harm to the victim(s).

Clearance and arrest data are also reported to Alabama´s UCR. A crime is considered cleared, either by arrest or by exceptional means, when enough evidence is found to charge a suspect and take him into custody. It is conceivable that one arrest could clear several offenses or that several arrests could clear one offense. The clearance rate is achieved by taking the number of clearances over the number of crimes reported,

$$\frac{\text{CLEARANCES}}{\text{REPORTED CRIME}} = \text{CLEARANCE RATE}$$

This report is a composite picture of crime and law enforcement activity in Alabama for 1982. It provides a breakdown for the State, the State´s eight Standard Metropolitan Statistical Areas (SMSA´s) and localities participating in the UCR program.

---

*A separate section on Arson will be included in this report.

DEFINITION OF TERMS

Structural

Single occupancy residential - houses, townhouses, duplexes, etc.

Other residential - apartments, tenements, hotels, motels, dormitories, boarding houses, etc.

Exceptional means provides a solution to a crime when there is enough evidence to place a formal charge against an offender, but some element beyond law enforcement control precludes an actual arrest. It is possible for one arrest to clear more than one offense.

Clearance rate - the clearance rate is achieved by taking the number of clearances over the number of crimes reported.

Crime rate - a measure of criminal activity which shows the number of crimes reported per 100,000 residents.

Criminal activity - measured by reported crimes, trends, rates.

Forcible entry - offenses in which force of any kind is used to unlawfully enter a structure for the purpose of committing a theft or felony.

Homicide - the willful killing of another as based on police investigation.

Incident-Based Reporting System - a voluntary crime reporting system developed by ACJIC as an alternative to the UCR Summary.

Juveniles - the UCR system defines juveniles as males and females 17 years of age and younger.

Recovery - finding stolen property. It should be noted that a recovered article does not clear a crime, although the owner is reunited with his property a crime was committed and a suspect must be taken into custody to clear the offense.

Reported Crimes - crimes reported to law enforcement officials.

NOTE: In this report, only those offenses which prove to be actual offenses are used. Those cases which have been deemed unfounded are excluded from the crime totals. (It should be mentioned that a change in reporting on the part of victims can effect an increase or a decrease for certain crimes.)

The tables on the following pages group cities according to population and list city names alphabetically. The percent change is the increase or decrease in reported crime over 1981. The numbers in parentheses indicated the number of months the agency reported to UCR if less than twelve months.

This report does not try to account for factors which contribute to the number and type of crime in a particular area, i.e., age, sex, race of population, transients, climate, employment, etc. Any effort to make crime comparisons between one area and another should be limited in scope and acknowledge the existence of these various factors impacting the incidence of crime.

*Percentages do not add up to 100% because the Sheriff's jurisdictions are not included here.

A clearance is a measure of law enforcement activity whereby enough evidence is found to charge a suspect and take him into custody (an arrest) or when a crime is solved but no formal charges are brought against a suspect (clearance by exceptional means). The clearance rate is achieved by taking the number of offenses and dividing that number into the number of clearances.

$$\frac{\text{CLEARANCES}}{\text{REPORTED OFFENSES}} = \text{CLEARANCE RATE}$$

It is important to note that clearance data is reported on a monthly basis to UCR and, therefore, it is possible for an arrest made in one month to clear a crime committed in previous months or years.

COUNTY DATA

Alabama is comprised of sixty-seven (67) counties, each averaging 756.8 square miles.

Incorporated and unincorporated areas not having a municipal police department are protected by the county sheriff and are included in his jurisdiction. Since UCR data deals with criminal activity in a particular geographic area rather than to law enforcement agencies activities, we do not intend, nor recommend, that this data be used to evaluate or compare one agency with another.

So, due to the diverse demographic characteristics, the county data will be presented in alphabetical order rather than by population strata. It will include reported crime and clearance data submitted by Alabama's 67 county sheriffs. County data does not include crime data submitted by municipal police departments contained within the county boundaries. The numbers in parentheses, on the following pages, denote the number of months the agency reported to UCR if it was less than twelve.

A clearance is a measure of law enforcement activity whereby enough evidence is found to charge a suspect and take him into custody (an arrest) or when a crime is solved but no formal charges are brought against a suspect (clearance by exceptional means). The clearance rate is achieved by taking the number of offenses and dividing that number into the number of clearances.

$$\frac{\text{CLEARANCES}}{\text{REPORTED OFFENSES}} = \text{CLEARANCE RATE}$$

It is important to note that clearance data is reported on a monthly basis to UCR and, therefore, it is possible for an arrest made in one month to clear a crime committed in previous months or years.

EMPLOYEE DATA

STATEWIDE

There were 388 law enforcement agencies* in Alabama in 1982 employing approximately 8,315 people - 6,297 sworn and 2,018 civilian. Considering only sworn employees, this provides a ratio of 1.6 officers per 1,000 population in Alabama. The national average approximates 2 officers per 1,000 population.

COUNTY SHERIFFS' OFFICES

There are 67 county sheriffs' offices in Alabama employing a total of 2,127 employees.

TOTAL PERSONNEL (sworn and civilian)	2,127
FULL TIME SWORN MALES	1,405
FULL TIME SWORN FEMALES	121
FULL TIME CIVILIAN MALES	278
FULL TIME CIVILIAN FEMALES	323

---

*Data used in this section were obtained from the employee data sheet submitted by law enforcement agencies to UCR. Over 99% of Alabama's law enforcement agencies completed this form. Please note that there are more law enforcement agencies than reporting agencies. This is due to the fact that many small agencies report crime through the county sheriff's office.
